CUSTOMER

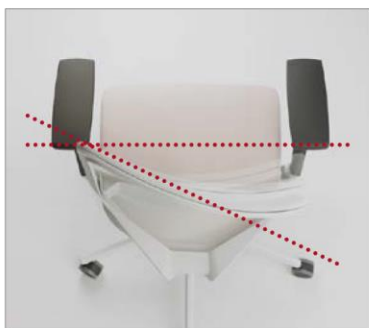

Forma 5 offers an immediate delivery service for the Dot.Home chair with mesh backrest. With fast internal management and express delivery, Forma 5 wants to support distributors who receive urgent requests from their clients working from home. We will deliver the chair within approximately **7-8 days** from request **directly to the door of your client's house.**

ERGONOMICS AND FUNCTIONALITY SPECIALISTS

Dot.home is designed to provide the same **ergonomics and functionality** required in a workplace, but at home. Specifically, Dot.home achieves all the regulations that **take care of health** and body posture of the user: self-weighting synchronized mechanism, gas lift of the seat, vertical adjustment of the arms and a flexible, adjustable, lumbar support. The Dot.home has a unique **mechanical elasticity** within the backrest, which allows the upper body to pivot. The technical mesh fabric facilitates high breathability.

All Forma 5 chairs meet the most demanding quality controls, as evidenced by the certifications by authorized and independent laboratories..

Disassembled chair.

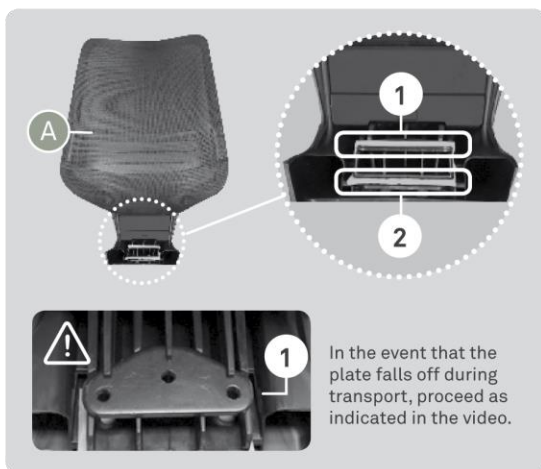

PACKAGING

The pack includes:
- User's Guide.
- Assembly instructions.
- Bag with fittings and Allen key.
The assembly of the chair is very simple, only using the Allen key and following the instructions included in the kit.

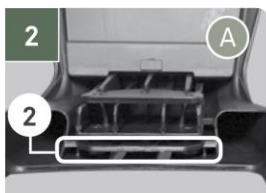

ASSEMBLY INSTRUCTIONS

▶ Assembly video

Place the seat face down on the corner of a table, avoiding supporting the arms.

Remove the cardboard from the backrest. Insert the mechanism fixing slat through the slot in the backrest where we have removed the cardboard sheet.

To facilitate the assembly of the backrest, we position it at a slight angle and introduce it by pushing from side to side.

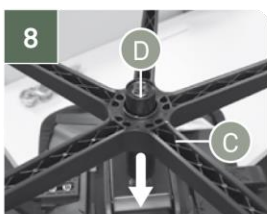

Align with the Allen key the holes in the backrest, mechanism and fixing plate.

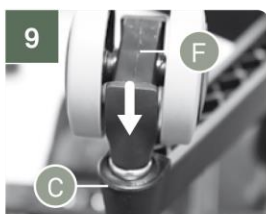

We introduce the screws and prefix the union without final tightening. Once screws are all in, complete final tightening. Check with your fingers that the screws protrude slightly from the bottom of the fixing plate.

We position the piston and give a light blow on the top of it.

We position the base by pressing lightly.

The casters are inserted into the pressure base.

We turn the chair holding it by the base and one arm. In this way, we avoid accidentally detaching the base itself or the piston.
